SANDHYA RANI GUNTUKU

CYBERSECURITY | ASPIRING SOC ANALYST | IT OPERATIONS

Hyderabad, Telangana | +91 93902 18465 | sandhyaraniguntuku15@gmail.com | linkedin.com/in/sandhya-rani-g-859b4a22b

PROFESSIONAL SUMMARY

IT operations and technical support professional with 2+ years of experience at LTM supporting a global client account in a ticket-driven, SLA-governed environment, together with prior Trust & Safety operations experience at Amazon. Experienced in issue analysis, troubleshooting, case tracking, documentation, escalation and cross-team coordination. Knowledge of TCP/IP, IPv4/IPv6, DNS, DHCP, VPN and LAN/WAN, complemented by cybersecurity training and a completed Python-based authentication-log monitoring lab. Seeking an entry-level SOC Analyst / Security Operations opportunity.

CORE SKILLS

Security & monitoring: Security fundamentals, log analysis, alert triage concepts, Nmap, Wireshark, Burp Suite (training exposure)
Networking: TCP/IP, IPv4/IPv6, DNS, DHCP, VPN, LAN/WAN, IP addressing, routers and switches
Operations: Incident management, technical troubleshooting, root-cause analysis, ticket lifecycle, escalation management, SLA management, SOP adherence
Tools & technical: Python (SentinelTrace lab), Linux OpenSSH authentication logs, JSON, CSV, HTML, SAP, process documentation

PROFESSIONAL EXPERIENCE

Software Engineer - Technical Support | LTM | Aug 2024 - Present | Hyderabad

- Support a global client account in a ticket-driven, SLA-governed technical operations environment, monitoring cases from intake through resolution.
- Perform initial issue analysis and technical troubleshooting, gathering relevant details and identifying root causes in line with defined procedures.
- Track cases through their lifecycle, coordinate with relevant teams, document findings and follow up through resolution or escalation.
- Escalate complex or specialized issues with supporting context; follow SOPs and quality standards while managing a high-volume queue.
- Handle account, subscription, licensing, payment, refund and order-related queries, including order processing in SAP.

GO-AI Associate | Amazon | Oct 2023 - Jan 2024 | Hyderabad

- Performed content annotation and quality reviews supporting Trust & Safety operations, applying defined policy guidelines in a high-volume workflow.
- Maintained review accuracy and process integrity while following data-handling and confidentiality requirements for sensitive content.

CYBERSECURITY PROJECT

SentinelTrace - Python-Based SSH Authentication Log Monitoring & Threat Detection | Independent Portfolio Lab | Nov 2026

- Developed a Python tool to parse Linux OpenSSH authentication logs and flag repeated SSH failures, successful logins following a failure burst, and remote root-account logins.
- Implemented rule-based severity prioritization, investigation recommendations, batch analysis and file-follow monitoring; exports alerts to JSON/CSV and an HTML triage report.
- Validated the lab against 8 synthetic authentication events, generating 3 alerts (1 Critical, 2 High); all 5 included unit tests pass. Uses synthetic training data, not production telemetry.

CERTIFICATIONS & TRAINING

Cybersecurity Certification - Frontlines Edutech (FLM) | Completed Aug 2026
Networking Fundamentals Training - LTM (Internal) | TCP/IP, IP addressing, DNS, DHCP, VPN, LAN/WAN, routers, switches and basic network security.
